TMA3084/TMA3083 Software Engineering Laboratories
Project Evaluation
(10%)

This assignment rubrics is used to assess project evaluation:

Deliverables	**Percentage**
Project Evaluation	10
TOTAL	**10**

	Project Evaluation (50 marks)	**Total Marks (50 marks)**	**Percentage (10%)**
CLO2/CLO3	**/50**		**/10**

Project Evaluation
(50 marks)

Criteria for assessment	*Performance levels*			
	Proficient (80 – 100%)	**Competent (50 – 79%)**	**Apprentice (20 – 49%)**	**Novice (0 – 19%)**
Defining the problem	The team states the problem clearly and identifies underlying issues	The team adequately defines the problem	The team fails to define the problem adequately	The team does not identify the problem
Developing a plan to solve the problem	The team develops a clear and concise project plan to solve the problem with alternative strategies	The team develops an adequate project plan	The team develops a marginal plan.	The team does not develop a coherent plan to solve the problem.
Specifications	The teams follow the specifications and includes additional features	The team follows the specifications.	The team changes some specifications.	The team does not follow the specification
Interpreting findings and solving the problem	The team provides a logical interpretation of the project and findings, and clearly solves the problem.	The team provides a logical but incomplete interpretation of the project and findings but solves the problem.	The team does not provide an interpretation of the project and findings, but solves the problem.	The team provides a logical interpretation of the simulation and findings, and clearly solves the problem.
Project breakdown	Project plan provides a precise amount of details about breakdown of tasks, division of work, and The team members responsibilities. Work is divided evenly amongst members.	Project plan lists most of the task, division of work and The team members responsibilities, but not with the right amount of details and misses important tasks.	Project plan lists some of the task, division o of work, and The team members responsibilities, but not with the right amount of detail or have serious omissions	A general statement that lacks sufficient detail to assure mutual understanding of project direction. Work is divided unevenly or not at all.
