Project objective formulation, methodology to be followed, and background (5 Weighting)	The objectives are well defined and prioritised. All relevant information and constraints are obtained and accurately analysed. Decisions and design recommendations are well supported by the information.	All major objectives are identified. Sufficient information is obtained. Appropriate analyses are selected. Decisions and design recommendations are reasonable and mostly supported by the information.	Most major objectives are identified, but one or two minor ones are missing, or priorities are not established. Most constraints are identified; some are not adequately addressed or accurately analysed. The decision and design recommendation are reasonable.	Many major objectives are not identified. Information is collected, but without any analysis. Only one solution is considered, and other solutions were ignored or incompletely analysed. Many constraints and criteria were ignored.
Clarity and presentation of the report (organisation, use of English) (5 Weighting)	The report is well organised and clearly written. The underlying logic is clearly articulated and easy to follow. Words are chosen that precisely express the intended meaning and support reader comprehension. Diagrams or analyses enhance and clarify presentation of ideas. Sentences are grammatical and free from spelling errors.	The report is organised and clearly written for the most part. In some areas the logic or flow of ideas is difficult to follow. Words are well chosen with some minor exceptions. Diagrams are consistent with the text. Sentences are mostly grammatical and only a few spelling errors are present but they do not hinder the reader.	Report is organized via topic/flow, but in some areas it is difficult to follow the flow of ideas. Words can be further improved. Some diagrams are not well explained. Grammar errors that impede the flow of communication.	Report lacks an overall organization. Reader has to make considerable effort to understand the underlying logic and flow of ideas. Diagrams are absent or inconsistent with the text. Grammatical and spelling errors make it difficult for the reader to interpret the text in places.

Section A: Online Pitching Presentation (10%) – Delivery & Engagement

Criteria for assessment	*Performance levels*			
	Proficient (80 – 100%)	**Competent (50 – 79%)**	**Apprentice (20 – 49%)**	**Novice (0 – 19%)**
1. Communication, Delivery & Engagement (5 marks)	The presenter communicates confidently with clear articulation and enthusiasm. Engages the audience effectively and responds to questions with a solid understanding.	The presenter speaks clearly but with limited variation in tone or pacing. Answers most questions with reasonable accuracy.	Delivery is monotone or hesitant. Limited interaction and incomplete responses to questions.	Poor delivery, unclear speech, or heavy reliance on reading notes. Unable to respond to questions effectively.
2. Visual Support & Time Management (5 marks)	Presentation is visually engaging, uses concise slides, and is completed within the allocated time. Minimal technical issues.	Slides are clear, but they are slightly text-heavy and lack visual impact. Presentation slightly exceeds or falls short of the time limit.	Slides are cluttered or contain excessive text. Time management is weak or disrupted by technical issues.	Poor or missing visuals. Presentation exceeds time by over 2 minutes or ends abruptly due to disorganisation.
